

The main title is "Automatic Machines for the Production of Absorbent Cotton Rolls". It is written in a bold, dark blue, sans-serif font. The background of the page features a large, detailed image of a complex industrial machine with various gears, rollers, and mechanical components, all in shades of blue and grey.The section header "Overview" is written in a dark blue, sans-serif font and is underlined with a thin dark blue line.

LINKS S.r.l. can offer a wide range of cotton rolls machines according to any specific request coming from the customers. Our rolling machines can produce cotton rolls of different weight, dimension (diameter and width) and have several options such as rolls with or without interleaving paper.

All our rolling machines are ready to work with our new and innovative Density weight control system LWC. We normally suggest to feed our rolls machine directly from the cards line through a conveyor belt in order to optimize the production and increase the performance and the efficiency of the line.

All our rolls machines receive the cotton band already folded and prepared at the required width and they convert the material into the finished products.

### AR1 MACHINE

**Range of production:**  
Cotton rolls (no paper)  
from 25 to 1000 gr.

**Production:**  
More than 200 kg/hour in 500 gr.  
and 1000 gr. rolls  
and 20 rolls of 100 gr. per minute

**Operators:**  
One

### AR1/2 MACHINE

**Range of production:**  
Cotton rolls (with paper)  
from 25 to 1000 gr.  
Without paper as per AR1 machine data.

**Production:**  
More than 200 kg/hour in 500 gr.  
and 1000 gr. rolls  
14 rolls of 100 gr. per minute  
Without paper as per AR1 machine data

**Operators:**  
One

### ARX2 MACHINE

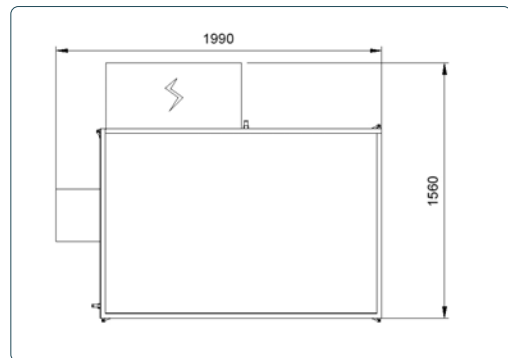

**Range of production:**  
Cotton rolls (no paper)  
from 25 to 100 gr.

**Production:**  
More than 40 rolls of 25 gr.  
per minute

**Operators:**  
One
